

CONFINED SPACE AWARENESS

Duration: 0.5 Days
Price (for up to 8 people): From £795 + VAT
Location: Element Safety (Sheffield) or on your site
[Manager 0.5 Day additional to Awareness session]

Theory: 100%
Valid for: 3 Years
Assessment: Continuous

Learn about what a confined space hazard is... and what it isn't!

If you need to know what a confined space is so you can look out for and avoid it, then this is for you.

Course Aims - To train individuals to be aware of the dangers of confined spaces; appreciate the roles and equipment involved with regard to allowing persons to enter, work in, and exit confined spaces.

THE COURSE COVERS:

- Definitions, risks, and hazards
- Risk assessments, safe systems of work, and permits to work
- Procedures for entry; environmental monitoring the environment and ventilation
- Confined space equipment required
- Roles and responsibilities within the team
- Emergency procedures needed

THE COURSE WILL ENABLE DELEGATES TO:

- Identify a confined space
- Have knowledge of relevant assessments, systems, and permits that are available
- Have a knowledge of environmental monitoring, ventilation, and other control measures
- Appreciate the importance of controlling entry into the risk
- Know the roles and responsibilities of a confined space - *manager, supervisor, and entrant*
- Be aware of emergency procedures under confined space regulations

PLEASE NOTE: THIS COURSE WILL NOT QUALIFY LEARNERS TO
WORK IN CONFINED SPACES.

SO WHAT DOES THIS MEAN...

This half day course will teach your team the legislation in an easily understandable way, where questions can be asked, and advice freely given to help your team determine if the space is a "confined" under the regulations.

It will also help you ask the right questions to identify the space, seek answers, and if 'confined' - then to avoid it.

Whether or not it is a confined space, a suitable risk assessment and some control measures can be a good idea anyway!
