

WORK AT HEIGHT MANAGER

Duration: 1 Day

Price (for up to 8 people): From £1197 + VAT

Location: Element Safety (Sheffield) or on your site

[Awareness 0.5 Days, Manager 0.5 Day additional to Awareness session]

Theory: 90% Practical: 10%

Valid for: 3 Years

Assessment: Continuous

Employers and managers of teams need detailed knowledge and understanding of work at height to assist them to control it, produce method statements, risk assessments and rescue plans. If you need to know what work at height is and how to control (or avoid) it, then this is for you.

Course Aims - To train individuals to be aware of the dangers of work at height; appreciate the differing levels of safety, equipment involved and the training needed with regard to allowing persons to access and work at height.

THE COURSE COVERS:

- Regulations, hazards, risks, planning for and rescue from work at height
- Risk assessments, safe systems of work, and management of the work area
- Procedures for access, methods and platforms
- Fall protection, anchor requirements
- Inspection, care and maintenance of PPE
- Harness selection and fitting

THE COURSE WILL ENABLE DELEGATES TO:

- Identify, assess and plan work at height
- Recognise good and bad practice
- Know about harnesses, lanyards and height equipment - physically know what to look for
- Understand fall protection - ABCDE
- Understand the need for rescue planning
- Know what is needed and assist with guidance in an emergency

PLEASE NOTE: THIS COURSE WILL NOT QUALIFY LEARNERS TO
WORK OR MOVE AROUND AT HEIGHT.

SO WHAT DOES THIS MEAN...

This 1 day course will give an awareness in the morning, delving deeper for managers in the afternoon

It will also help you ask the right questions. There will be opportunities to discuss scenarios, explore problems, develop solutions and the equipment that needs to be in place.

The team responsible for safety need to know more so...

- we can assist the designers and team managers to create more informed and better solutions to the construction problems of the new project
- we're confident in taking clearer action on the ground due to the greater knowledge we've gained
- we can create more appropriate risk assessed methods of working and rescue

It gives the opportunity to talk through potential alternative solutions. Sometimes you can be too close to a problem, and you don't know what you don't know!
